AB-HI100-900Y

High Impact &  
Energy Absorbing  
Bollard

The Essential First Step

Dimension	100mm (DIA) x 5mm (Wall Thickness) x 900mm (Length)
Material	Zinc Coated Mild Steel, Metallic Powder Coated in AB Safety Yellow
Installation	Sub-Surface mounted, concrete footing 400mm x 400mm x 500mm. 600mm above ground, 300mm in ground.
Weight	11 Kg
Additional Notes	They both come in either a (yellow & grey) finish and are specifically designed to be backfilled with concrete, as required additionally to the already fitted at the head, reflective 3M warning safety tape, these bollards come with a specific designed stainless steel cap, which fits (held in place by additional caulking) on the head of the bollard, after the concrete back filling operation has been completed.  Meets OH&S liftable guidelines for manual handling.
