

**AB-WRS**  
**LED Wired Road**  
**Stud**

The Essential First Step

Dimensions 100\*108\*20mm

LED Lights 6 Per Side (Amber)

Material Aluminum Alloy

Visible Distance 800m

Load Resistance 16 Tons

Input Voltage 12/24V DC or 220V; Connection Cable: 0.5 to 1mm Flexible Wire.

Additional Notes Australian Bollards - Wired road markers have 6 blinking LED amber lights on each side and up to 150 can be synched to the one controller.

The wired road studs would be best suited to an area where there is no light, such as in a tunnel.
