Fenders

The Essential First Step

Sizes 250mm (H) X 500mm (W) X 1000mm (L) to 1000mm (H) X 2000mm (W) X 3500mm (L)

Material Unique Rubber Compound

Nominal Deflection 52.5%

Buckling Deflection 30%

Max Deflection 55%

Durability Medium

Additional Notes Arch fenders are mostly suited to small and mid-ranged boats where mounting space is limited. The unique 'V' shape of arch fenders helps to disperse impact evenly, minimising pressure on one part of the fender.

They have an effective energy to reaction force ration and are suited to all port structures. Arch fenders are strong and hard wearing, they are very easy to install and are virtually maintenance free.
