Fenders

The Essential First Step

Sizes 300mm (H) X 480mm (D) to 3000mm (H) X 3350mm (D)

Material Unique Rubber Compound

Nominal Deflection 52.5%

Buckling Deflection 27.5%

Max Deflection 55%

Durability High

Additional Notes Cell Fenders are one of the most commonly used fenders, particularly for larger vessels because of its reliability and durability. With large fender panels, the hull pressure is kept to a minimum as well as distributing the fender load over the back of the panel frame.
 Mounting bolts makes cell fenders easy to install and a geometric shape gives it sturdiness to absorb impact from all directions.
