

**AB-MPRF**  
**Profile Marine**  
**Fenders**

The Essential First Step

Sizes	150mm (H) X 150mm (W) X 150mm (L) to 600mm (H) X 600mm (W) X 500mm (L)
Material	Unique Rubber Compound
Tensile Strength	11MPa
Compression Deflect'n	25%
Durability	Medium to High
Additional Notes	<p>Profile Fenders are commonly used in jetties, pontoons and frame-type wharves and are suitable to cope with a variety of vessels. The D-shape of the fender provides high energy absorption as well as a relatively high reaction force.</p> <p>Profile fenders are easy to install and operate making them the economical and efficient solution to preventing damage to vessels or ship docks. These fenders can be mounted in a variety of different ways to suit your specific application.</p>
