

TRIDENT AB-TS3-PAS68

AustralianBollards.com.au

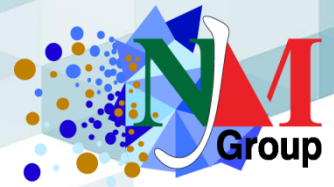

The new low-cost TRUCKSTOPPER 3 is the ideal solution for perimeter fencing or stand alone bollards. As with Truckstopper 1 and 2 the TRUCKSTOPPER 3 it is designed to meet the threat of anti terrorist attacks and can be assembled easily and quickly. The post foundations are only 400mm deep and 1m wide. They are designed to rival existing add on like perimeter fences or street furniture design for quick fitting.

Successfully tested at MIRA to BSI PAS68:2007 with a 7.5 tonne truck at 30mph (48km/h) it too can follow the contour of the ground and follows corners. And again once fitted it needs no ongoing adjustment or tensioning of the barrier and the steel is good for 20 year wear, with the only need for re-painting. The bollard can be fitted with either a mild steel shroud (as above) or a stainless steel shroud.
