

Impact Absorbing PAS68 Bollard

The only bollard that meets Australian and New Zealand Standards, the Impact Absorbing PAS68 bollard is designed for areas experiencing high foot traffic to protect pedestrians and hostile vehicles. It is the benchmark bollard for tram stops, sidewalks and pedestrian walks Australia-wide.

It stands one meter tall and is sub-surface mounted and is designed, developed and manufactured in Australia, and also repairable after impact.

Impact Absorbing PAS68 Bollard
